About Us	Pricing	FAQs							

How it works?

DeziNow is a platform (app) where we connect customer with designated drivers*.

- 1. Customer utilizes the app to request a driver.
- 2. Request will go out to nearest drivers until request is accepted.
- 3. Driver will arrive at the location where the customer is waiting. Drivers requested through

the DeziNow App can be identified via a DeziNow badge.

- 4. The driver will take the keys from the customer.
- 5. The driver will carefully and safely drive the customer to the desired location.
- 6. Once the driver arrives at the desired location, the app will automatically calculate the amount for the trip.
- 7. No cash needed because all transaction will be done via the app.
 - Drivers utilizing the DeziNow app and services are not employees of DeziNow but Independent
 Contractors. DeziNow does run background checks for the Independent Contractors that sign up to be
 drivers in the DeziNow platform (app). The Drivers will be Independent Contractors (not employees) of
 DeziNow and will have the option of taking the job that the customer requests or not after signing up and
 installing the app.
